TOURNAMENT-TRACKER ®

TOURNAMENT-TRACKER ®

From the pioneering developer of event fundraising software.

Now you can easily facilitate and manage benefit golf tournaments of any size and configuration - from pre-event activities to event day and beyond!

Whether you are an organization planning your first benefit golf tournament, an organization raising thousands of dollars at annual events or an organization producing multi-million dollar events, Tournament-Tracker ® makes managing your fundraising event activities easy. Tournament-Tracker provides you, your staff and volunteers with the capability to effectively plan, manage and analyze every aspect of your benefit golf tournament!

BENEFITS

Flexibility!

Is your current data management system forcing your benefit golf tournament down a road you don't want to take? Tournament-Tracker allows you the flexibility to manage events your way with your ideas. Tailor each event's configuration to meet each of your event's specific needs and requirements. Vital information is obtained effortlessly through extensive reporting capabilities.

Priced to Protect
Your Longterm Investment!

Tournament-Tracker adapts to meet your fundraising event's continuing needs. Purchase Tournament-Tracker one time - no yearly fees to break your already limited budget; no per workstation fees; affordable upgrade pricing to keep you current; and updates are always free! Comprehensive technical support (best in the market!) ensures that you realize the full potential of your investment. Application support includes traditional phone support, online live chat, 24/7 email, free access to our international user's group and online support reference center with full text search.

Save Time! Save Money!

Survey results show an incredible time savings of up to 75% over using spreadsheets or other event fundraising management software products. You enter names as constituents only once, and then assign event designations with the click of a mouse. Constituent data is easily imported or exported to and from donor management applications, thus saving valuable time from re-entering data and starting from scratch. Forms, payments, receipts and billings take only minutes, and detailed reports will look like they took hours!

Time savings for staff translates to cost savings for the organization. Save money by effortlessly printing your own event worksheets, RSVP and sponsorship billings, donation receipts and personalized letters. There is no need to break your budget to put on a first-class event!

We Back It Up!

Great software isn't enough - experienced support is the key to choosing an application provider. NSTI offers experience, knowledge, stability and technical expertise that is unsurpassed. Since 1992, NSTI has set a standard that no other developer has yet been able to successfully duplicate. NSTI understands the practical applications of fundraising event management, providing users with ongoing feedback of industry, federal tax laws and peer issues. NSTI draws from client experience, as well as the expertise of event consultants and fundraising professionals.

FEATURES

How is Tournament-Tracker different from what I am currently using?

Tournament-Tracker is written <u>specifically</u> for event fundraising golf tournaments and manages the entire event in one comprehensive software application. You do not have to be a programmer or spend weeks configuring a database program of your own before you can begin. Once Tournament-Tracker is loaded you are ready to begin <u>immediately</u>!

Tournament-Tracker manages all types of fundraising tournaments including traditional Stroke, Scramble and Best Ball play in either individual or team play formats using stroke, stableford or par scoring.

True Relational Database Design

Tournament-Tracker organizes your event in one software application using a true relational database design. This means that every aspect of your tournament - every detail, every individual and every association between them - is linked. You only need to enter information once and the relationships are managed throughout the program as needed.

Example: Enter a constituent one time and then designate that individual as a participant (player), banquet attendee, sponsor, solicitor or volunteer - in any combination you wish. Additionally, designate constituents to one or a combination of an unlimited number of user-defined resource lists!

Event Time Savers That Meet <u>Your</u> Event Goals

Achieving the level of success <u>you</u> want for <u>your</u> event requires a tool that makes your job easy to perform. Here is a short list of the powerful functions that will make your job easier:

- Manage all aspects of your participants (players) including confirmation number, RSVP level, payment history and personal profile that includes player status (amateur/professional), shirt size, home club, team assignment and much more!

- Manage all aspects of your banquet attendees including confirmation number, entrees and reserved seating. Also manage important seating preferences that help you resolve those last minute "political" seating issues.

- Manage event sponsors and their level of contribution including corporate underwriting, hole sponsorships, advertising, cash gifts and more!

- Track event sponsors and their donations of goods and services for event and hole prize distribution.

- Manage volunteers, their team assignments and job functions.

- Manage all event and hole contests for each round defined.

- Track and manage all item sales such as mulligans, shirts, caps and more!

- Input and manage all player scores... by team, by individual.

- Input and manage all player contest winners and related awards.

- LetterWriter enables you to customize and produce letters (correspondence) with ease through your favorite word processing software application.

Import/Export Existing Constituent Data

Save valuable data entry time by importing names and addresses from a variety of sources including custom databases, spreadsheets, other event management applications and all of today's popular donor management applications!

Export pertinent data gathered during your tournament to your favorite donor management application for comprehensive constituent profiling.

Comprehensive Reporting

Tournament-Tracker has over 80 reports which can be produced with the click of your mouse. All reports have been developed with input from the leading development professionals, event coordinators and, most importantly, users like you! Reports guide your tournament preparation, give up-to-the-minute tournament results and provide full post-event analysis.

Federal Tax Headaches Resolved!

Like other Tracker-Series applications, Tournament-Tracker complies with not only the substantiation laws of the Internal Revenue Service here in the United States, but other countries such as Australia (Taxation Australia) and Canada (Revenue Canada). Receipts and statements are specifically designed to provide proof of giving or purchase and relates federal deductibility law to the constituent regarding the opportunities for potential deduction.

Why trust your tournament's hard earned gifts to anything else!

Hardware Requirements...

Tournament-Tracker is a Microsoft Windows and Local Area Network (LAN) based software application. To run this program, the minimum system configuration described below is required:
